

Environmental Policy

Save energy. Save money. Save the environment.

Thermoservices Limited recognises its duty, during the provision of its services, to act in a responsible manner to limit its impact on the environment. This includes procurement of materials and equipment as well as the potential impact on waterways and the surrounding environment.

Our ongoing duty includes consideration to:

- Control and use of resources from renewable stocks
- Release of harmful products to land, air and water
- Causation of noise and vibration
- Visual and aesthetic impact
- Transportation of equipment and materials

We have a general duty of care to the environment and are concerned for the protection and enhancement of the environment in which we live and work.

Our key policy aims are:

- Provide our services in such a way to reduce or avoid adverse impacts on the environment
- Minimise the consumption of non-renewable resources
- Maximise use of renewable resources
- Comply with environmental legislation, regulations and bye laws
- Continuously improve our environmental performance

This will be achieved by:

- The Director co-ordinating the implementation of this policy
- Ensuring that sufficient resources and finances are made available
- Monitoring progress against targets
- Insertion of the policy within the management system
- Delegating responsibility to job managers for implementing the practices of this policy
- Rewarding individuals who in the course of their duties make outstanding contributions to environmental protection
- Training personnel in awareness of environmental issues and encouraging their commitment to continuous improvement
- Ensuring that environmental issues are given equal status to that given to health, safety and quality
- Seeking suppliers and contractors with similar responsible attitudes to environmental issues
- Reviewing and updating this document as appropriate but at no longer than 12 monthly intervals
- Recycling where possible, for example, paper, cardboard boxes and ink cartridges.
